Miscellaneous information

Performance

Bisabolol is stable in formulations with a wide range of pH 3-10.

Example of use

Bisabolol protects and heals the skin from the effects of daily stresses. It is a naturally occurring active ingredient that accelerates the healing process of skin. Bisabolol can be used with confidence in personal care formulations, especially in products for sensitive skin, baby care, after-shave, and after-sun applications. Its added anti-inflammatory properties make it a truly versatile active ingredient for skin care products. Bisabolol can be combined with almost all common cosmetic ingredients in formulations.
