

Technical Information

ROVISOME® Retinol Moist

Intended use

Active for skin care

Benefits at a glance

- Enhanced stabilization and effectiveness of retinol
- Excellent wrinkle fighting benefits
- Lower skin irritation potential
- Improved skin moisturization

INCI (PCPC name)

Water/Aqua; Pentylene Glycol; Lecithin; Alcohol; Retinol; Polysorbate 20; Potassium Phosphate; Tocopherol; Ascorbyl Palmitate; BHT; BHA

Chemical and physical properties (not part of specifications)

Appearance	Clear, yellow, fluid
Active matter	1.0 – 5.0%

Properties

ROVISOME® Retinol Moist is formulated to deliver a high concentration of pure retinol to deeper skin layers. ROVISOME® Retinol Moist is characterized by excellent stabilization of the cosmetic active within the ROVISOME® delivery system. The stability of the encapsulated retinol was measured by HPLC analysis at different temperatures over 24 weeks, with results demonstrating that ROVISOME® Retinol Moist can provide significantly better retinol stability.

HPLC chemical stability

The stability of the retinol within ROVISOME® Retinol Moist was investigated to demonstrate the stability benefits of the ROVISOME® delivery system 1) ROVISOME® Retinol Moist (pure, 2% retinol) and 2) aqueous retinol solution with 2% retinol. In all tests, HPLC was used to measure retinol levels. These formulations were stored at room temperature (RT) and 40 °C and measured after 4, 8, 12, 18 and 24 weeks.

Results: Compared to the aqueous solution of retinol the Delivery System product ROVISOME® Retinol Moist achieved significantly better stability at RT and at 40°C. ROVISOME® Retinol Moist is proven to preserve very well the stability of retinol.

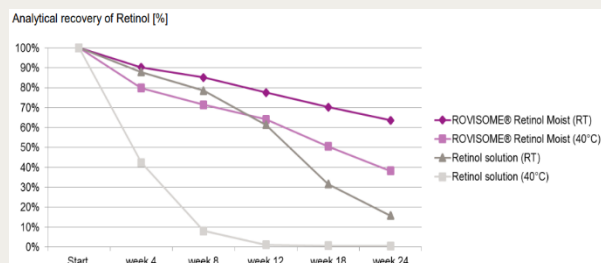

Figure 1: Improved stability of retinol.

Preparation

ROVISOME® products can easily be processed into final formulations by stirring them in at 30 °C, typically toward the end of a formulation process.

Recommended usage concentration

1–3 %

Applications

- Body care
- Eye care
- Face & neck care
- Hand & foot care
- Wet wipes & face masks
